LTL FTL Road Transport

If you are looking to transport your goods quickly and efficiently, consider LTL or FTL freight.

LTL is the most cost-effective way to ship small packages, and the full truckload method is the fastest way to deliver larger shipments. But if you have a tight budget or need to meet a specific delivery date, LTL is the way to go.

LTL also offers flexibility when it comes to delivery dates and can be the best option for shipments under 12 pallets.

AL Nowras is one of the top transportation company in the Middle East. With offices at each entry and exit of the Sultanate, the company offers the best LTL FTL freight between Oman and UAE.

Special Cargo Logistics

Special cargo refers to any form of freight, which requires special handling, supervision, and careful monitoring/tallying - this includes hazardous items as well as valuable goods.

We can export Special Cargo by either using a Brickade truck or a Titan vehicle. Both trucks have up to three crates at a time for faster exporting.

AL Nowras can help you plan and implement an end-to-end special cargo transport, whether by air, sea, or land. We supply the equipment and support necessary for the safe handling of your shipment - plus any regulatory issues that might arise during its transit - and arrange customs clearance and warehousing services with their dedicated account manager available at all times to guide them through this process.

Bonded Transportation

When you want to ship goods from one country to another, you should consider using a Bonded Road Transport Service.

We at AL Nowras can manage your shipments in a systematic manner and provide you with all the necessary services. We follow proper SOPs, such as driver management and random assignment of drivers, to prevent any potential incidents. In addition, AL Nowras keeps constant communication with all truck drivers.

Break Bulk Cargo

Al Nowras specialize in transportation of bulky goods. We work closely with companies & partners to deal with heavy & large cargo shipments. As Al Nowras has implemented most projects in the Sultanate of Oman, it has gained extensive experience in dealing with heavy & large cargos.

Our fleet is equipped to handle heavy equipments & we hold a network of partners to deal with loads weighing more than 50 tons & other bulk cargo. To carry out heavy loads, the company conducts a survey of the tracks to identify the obstacles & dangers to obtain the necessary permits from the competent authorities.

Break Bulk

- Our experts deliver tailor-made solutions ensuring a safe and secure handling of the cargo.
- Our team is focused on loss and claim prevention, enabling a safe and smooth delivery.
- On board vessels, your cargo will be stowed on a pre-prepared bed containing multiple flat racks, thus providing a safe working environment for stevedores and ensuring maximum lashing opportunities in accordance with IMO CSS Code Annex 13 requirements.

When shipping oversized cargo with AL NOWRAS, our customers benefit from a wide range of service features, including:

- Load, lash and secure the cargo at your origin port or nearby depot.
- Customs clearance and documentation
- Inland collection and deliveries using variety of equipment.
- Arrangement of police/inland transport notifications if required.
- Port storage facilities
- Competitive rates

Cargo Insurance

With proper logistics insurance in place, you can rest easy knowing your high-value goods will arrive safely and on schedule. Our dedicated team of logistics specialists keeps a constant eye on every stage of transport so we know exactly where your package is at any given moment. Furthermore, we verify truck driver adherence to planned routes for added assurance that goods are transported in the safest possible manner.

High-value goods require extra care when being shipped, which is why we provide tailored insurance plans designed specifically to protect them. Our team can assist in selecting a plan tailored specifically to your business, while taking the time to understand its particular risks so we can offer comprehensive protection coverage.

Warehouse-to-warehouse coverage solutions extend the general average clause of open ocean cargo policies. This coverage type is especially important when shipping liquid gases that make shipping via standard containers more complex than expected.

Why Choose US?

Quality

Reliability

Custom Tailor-Made Logistics Solution

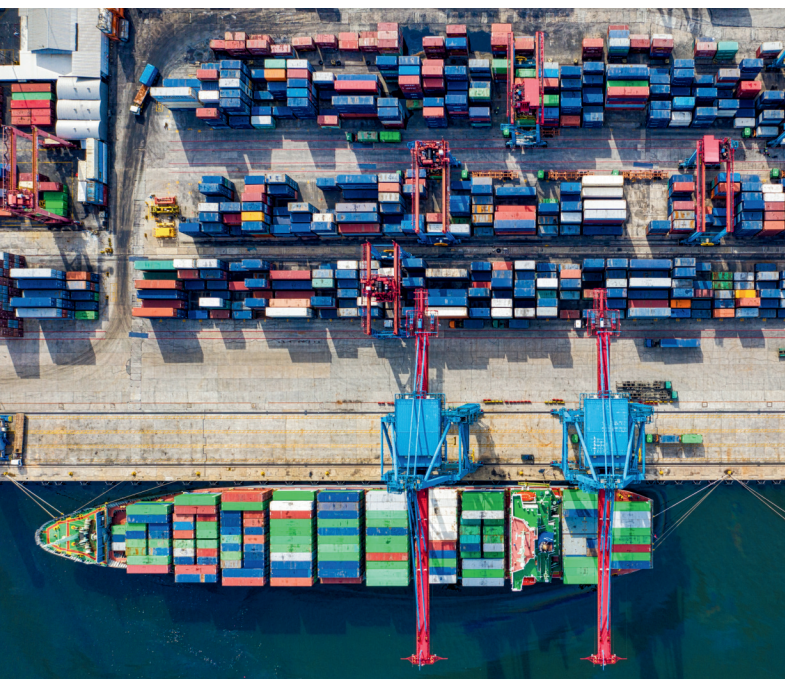

24/7 Support |
100% Customer Satisfaction

Live GPS Tracking

Best Price Guarantee

Live GPS Tracking of Trucks

Our GPS Tracking system collects vital data during operations that go into the monitoring and management of all the critical aspects of the transportation process, such as fleet maintenance, dispatch management, and on-the-field security alerts.

We offer a live tracker device solution that is capable of performing functions such as identifying unauthorized use of vehicle, sudden changes in performance, maintenance issues, over-speeding, excessive idling, remote ignition relay.
